

# RAM® SAFE-T-CHARGE™ BATTERY PROTECTION SYSTEM

## DESCRIPTION:

RAM is proud to introduce the latest addition to the RAM product line, the RAM Safe-T-Charge™ battery protection system. The RAM Safe-T-Charge™ is feature rich and affordable making it the best choice in protecting your vehicle or boat's electrical system and battery. With multiple configurations available through onboard dip switches, the Safe-T-Charge™ can be configured to shut down connected devices either by a trigger coming from the ignition of the vehicle or by sensing a drop in the DC voltage below a level capable of starting your engine. Easily select a predetermined duration of time to have your connected devices shut down to assure you will always be able to start your vehicle. The RAM Safe-T-Charge™ offers a audible tone starting five minutes before the timer shuts off power to your devices, and continuing every minute until the power is shut down. The on board over-ride switch enables the user to by pass the timed shut off feature in the case of an emergency or other event which requires immediate access to device power.

## SPECIFICATIONS:

- Dimensions: L x W x H = [95 mm/3.74"] x [80mm/3.15"] x [32mm/1.26"]
- Materials: ABS, flame retardant plastic construction
- Water-proof for use in marine environments
- 30AMP Rating
- 24V jump start protection

## CONFIGURATION:

- 1 Battery + 12V input terminal
- 2 Output terminal (More outputs can be connected by overlapping the wires and fastening.)
- 3 Ground terminal
- 4 IGN terminal
- 5 Over ride switch
- 6 Timer start LED
- 7 Selector for DC or IGN sense
- 8 3-dip switch for time set
- 9 Mounting holes
- 10 Sticker on turning cover for indication of time setting
