Vehicle base for the
CHEVROLET COLORADO (2004-NEWER)
GMC CANYON (2004-NEWER)

INSTALLATION INSTRUCTIONS

Tools required for installation are an 18mm socket, and ½" box end wrench. You may also consider using a wobble adapter or universal joint style extension to aid in the installation of the hump side seat leg bolt.

1. Attach the adjustable riser to base with the provided carriage bolts, washers, and nuts. Use the ½" box end wrench to fully tighten the riser to the base.
2. Move the passenger seat to the rearmost setting.
3. Remove the front seat rail bolts that fasten the passenger seat brackets to the vehicle floor using the 18mm socket.
4. Pass the bolts you just removed through the holes in the No-Drill™ base.
5. Place the base with bolts over the seat frame legs, align the bolts with the holes, and start the thread by hand into the vehicle floor board.
6. Once both bolts have been started by hand, use the 18mm tools and fully tighten to 35 ft lbs.
